—— BELIEVE HARD ——

# edito

We both started playing football when we were very young. In retrospect, we were lucky to start as children because it gave us the chance to reach our objective : go pro !

We play football with a passion and we have been able to make the most of our determination, work hard to reach our objective : become a pro! Today, our mission has changed.

The time has come to share and transmit our experience of the highest level through our program.

The ZE academy isn't just a group investment, it is also an individual one, in order to help each academician reach their fullest potential.
